

DevOps

Why the need of DevOps?

↳ before DevOps, waterfall method was used which delayed release and complicated integrated between dev & ops Team.

What is DevOps?

↳

Which software was used for DevOps?

↳ Atlassian Jira (work on Agile methodologies)

↳ used by teams using Waterfall or hybrid Models.

Code → (Version Control) → Github

CI → Auto build + test

CD → Auto deploy + test

Container → Docker

Monitoring → Grafana
(visualizing & analyzing metrics, logs)

Metrics → New Relic & Sentry.

With DevOps

Fast

Automated

Isolated teams

Automated Process

Without DevOps

Long release cycle

Manual error prone

Collaborated team

Manual Redesign

Benefits:

↳ Faster Roll out

↳ Low failure Rate

↳ Faster Recovery to failure

↳ Better Scalability & Security

Linux

↳ Kernel (core component)

↳ shell

↳ file System.
